

PROFESSIONAL SUMMARY

Systems-focused IT professional with experience in technical support, endpoint management, and infrastructure operations. Skilled in troubleshooting hardware, software, and network issues while supporting day-to-day IT environments. Hands-on experience working with enterprise systems, endpoint configuration, and user support. Strong foundation in DevOps, automation, and cloud technologies, with working knowledge of virtual desktop infrastructure (VDI) including VMware Horizon and Citrix environments, and endpoint management tools such as Wyse Management Suite (WMS).

Professional Experience

Technical Support Specialist - Aignep USA

June 2025 – Present

- Provide day-to-day IT support for internal users by troubleshooting hardware, software, and network-related issues, ensuring minimal disruption to business operations
- Assist in endpoint setup, configuration, and lifecycle management of user devices, maintaining system performance and consistency across environments
- Work with endpoint management tools such as Wyse Management Suite (WMS) to monitor, configure, and support thin client and user systems
- Support virtual and remote desktop environments, including user access, connectivity troubleshooting, and session stability
- Gain hands-on exposure to VDI platforms such as VMware Horizon and Citrix while assisting in remote desktop support and issue resolution
- Collaborate with cross-functional teams to identify recurring system issues and implement improvements for better reliability and performance
- Develop internal tools and automation solutions to streamline workflows, reducing manual effort for sales and support teams
- Supported system administration tasks including user support, endpoint maintenance, and environment stability across business systems
- Maintain technical documentation and provide user guidance to ensure smooth adoption of internal systems and tools.

Innovation Award

Dec 11, 2025

- In recognition for introducing and implementing innovation projects.

Student Associate – IT, SNHU, Manchester, NH

December 2023 – April 2024

- Provided technical support for hardware setup, software installation, and troubleshooting of user-reported issues in a campus environment
- Assisted in resolving system and application issues, ensuring smooth day-to-day IT operations for staff and students

DevOps Engineer - Outworks Solutions (Client: JIO) – Navi Mumbai, India

May 2021 – June 2023

- Designed and maintained CI/CD pipelines using Azure DevOps, Jenkins, and GitHub Actions to support consistent and reliable application deployments
- Automated deployment workflows using shell scripting and configuration management, reducing manual errors and improving release efficiency
- Managed containerized applications using Docker and Kubernetes, ensuring scalability and high availability across environments
- Supported production deployments and monitored system performance, proactively identifying and resolving infrastructure issues

- Collaborated with development, QA, and operations teams to ensure smooth releases and maintain system stability in high-traffic environments.
-

Education

Master of Science in Information Technology. **Graduated: April 2025**

Southern New Hampshire University, Manchester, NH **GPA: 3.9 / 4.0**

- **High Honor Roll – 2025 D-1 Term (Jan–Mar) & A-1 Term (Jan–April)**

Awarded for ranking among the top-performing graduate students, based on academic excellence in a complete term.

Bachelor of Computer Science and Engineering

Aurora’s Technological & Research Institute, India **Graduated: 2020**

PROJECTS

Crossover Parts Matching Platform

- Built a full-stack web application using Python (Flask), SQL Alchemy, HTML, CSS, and JavaScript.
- Developed a searchable database for fast part lookup and comparison.
- Deployed application using Render with GitHub integration.
- Improved internal efficiency by reducing manual processes.

Goaluu – AI-Powered Mobile Application

- Developed a cross-platform mobile app using Flutter and Dart.
 - Integrated OpenAI API for personalized goal tracking and insights.
 - Designed dashboards for tracking habits and progress.
-

TECHNICAL SKILLS

- Programming: Python, SQL, Shell Scripting, Dart
 - Web Development: Flask, Django, HTML, CSS, JavaScript
 - DevOps Tools: Azure DevOps, Jenkins, GitHub Actions
 - Cloud & Containers: AWS, Azure, Docker, Kubernetes
 - Databases: MySQL, SQL Server, SQLite
 - Tools: Git, Linux, Windows
-

SYSTEMS & INFRASTRUCTURE SKILLS

- Endpoint Management: Wyse Management Suite (WMS), device configuration and support.
- Virtual Desktop Infrastructure (VDI): VMware Horizon, Citrix (working knowledge).
- Operating Systems: Windows, Linux (Ubuntu, CentOS).
- User & Access Management: Active Directory (basic), Group Policy (GPO).
- Troubleshooting: Hardware, software, network, and user support.
- Remote Access: RDP, SSH.
- System Support: Application deployment, environment setup, and maintenance.
